Intended use

The Wako μTASWako AFP-L3 Calibrator Set is designed to be used with the Wako μTASWako AFP-L3 Immunological Test System for the quantitative determination of AFP-L3% in human serum.

Reagents and ingredients

μ TASWako AFP-L3 Blank	2 × 2 mL
51 mmol/L Phosphate buffer, pH 6.0	
μ TASWako AFP-L3 Calibrator 1	1 × 2 mL
51 mmol/L Phosphate buffer, pH 6.0	
Human AFP-L1 fraction	
μ TASWako AFP-L3 Calibrator 2	1 × 2 mL
51 mmol/L Phosphate buffer, pH 6.0	
Human AFP-L3 fraction	

Store at 2–10°C. (Do not freeze)

Accessories

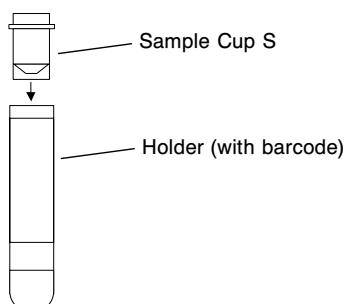

μTASWako AFP-L3 Blank Holder (with barcode)	1 piece
μTASWako AFP-L3 Calibrator 1 Holder (with barcode)	1 piece
μTASWako AFP-L3 Calibrator 2 Holder (with barcode)	1 piece

Reagent preparation

Use the calibrators as supplied. Calibrators are stable until the expiration date printed on the label when stored at 2–10°C. (Do not freeze)

Procedure

The concentrations of the analytes are supplied by the barcode attached to the holder included in the μTASWako AFP-L3 Calibrator Set. μTASWako i30 automatically obtains such information from the barcode when calibrators are supplied together with the holders on the QC rack of μTASWako i30. Refer to the μTASWako i30 Instruction Manual for the details of calibration procedure. Sample cups are supplied separately.

Determination of assigned values

Assigned values : See bottle labels.

Determination : Assigned values are determined by measuring a calibrator with the μTASWako AFP-L3 and standards for AFP-L1 and L3 whose AFP levels are traceable to the 1st international standard for alpha-fetoprotein from NIBSC. Purity of AFP-L1 and L3 fractions is recognized by the method combining lectin-affinity electrophoresis and antibody-affinity blotting⁽¹⁾.

Warnings and precautions

- (1) For in vitro diagnostic use.
- (2) Not to be used internally in human or animals.
- (3) Do not use any calibrator holders other than those included in the same Calibrator Set.
- (4) Do not dispose the calibrator holders until the calibrators are consumed.
- (5) Do not use the calibrators for any other purpose than described herein.
- (6) Do not use the calibrators past the expiration date stated on each container label.
- (7) Do not use the calibrators in any other procedures than those described herein. Refer to the package insert of μTASWako AFP-L3 and μTASWako i30 Instruction Manual for additional information on the procedure.
- (8) Store the calibrators under the specified conditions.
- (9) Do not use the calibrators if they are frozen by mistake, since optimal results may not be obtained with frozen, then thawed calibrators.
- (10) Do not use the containers for any purposes other than those described herein.
- (11) If the calibrators come in contact with mouth, eye or skin, wash the exposed area immediately with a large amount of water. Contact a physician if necessary.
- (12) The calibrators contain some human origin materials. The materials have been tested and found negative for HBsAg, anti-HIV-1/HIV-2 antibodies, and anti-HCV antibody. Because no test can offer complete assurance that products derived from human will not transmit infectious agents, it is recommended that this product should be handled with the same biohazard precautions used for patient specimens.
- (13) Dispose of calibrators according to your local or national regulations.
- (14) FDA UDI (Unique Device Identification) is on the box. Keep box until reagent is finished.

This product contains components classified as follows according to the European Regulation :

Hazard designation of product

Warning

Mixture containing :

5-Chloro-2-methyl-2H-isothiazol-3-one [EC No 247-500-7] and 2-Methyl-2H-isothiazol-3-one [EC No 220-239-6] (3:1)

Information pertaining to particular dangers for man and environment

Hazard statement

May cause an allergic skin reaction.

Precautionary statement

Avoid breathing vapours/spray.

Contaminated work clothing should not be allowed out of the workplace.

Wear protective gloves/ protective clothing/ eye protection.

If on skin : Wash with plenty of soap and water.

If skin irritation or rash occurs : get medical advice/attention.

Wash contaminated clothing before reuse.

Dispose of contents or container in accordance with local/regional/national/international regulation.
